## Personal statement

An avid web app developer currently working with **Appactive**, a Backend-as-a-Service platform, as a **founding member**.

Cares a great deal about how people react to software, design and images.

## Technical skills

### Languages

- Proficient in: JavaScript, HTML, CSS, AJAX, Node.js
- Exposed to: C#, Shell script, Python

### Software & Technologies

- Platforms: Microsoft Windows, Mac OSX, and Linux
- Databases: MS SQL Server, MongoDB and Redis
- Other: JavaScript MVC frameworks, ASP.NET, AWS, Azure, SEO and Jenkins CI.

## Experience

### Web Developer

Sep 2012 – Present

*Appactive Software – Pune | [www.appactive.com](http://www.appactive.com)*

- Member of the core founding team since the inception and incubation.
- Architected and implemented a pure client side web framework for the platform, reducing the server load merely to fetching resources. Harnesses web browsers caching capability and server side bundling to improve the website's performance and make it more responsive.
- Responsible for designing the framework for data visualization engine using graph layout.
- Brought in new techniques for reducing overhead on making Cross Domain AJAX calls.
- Built a secure and scalable Node.js sandbox module for executing third party scripts on the cloud.
- Author and maintainer of the official JavaScript SDK for the Appactive platform.
- Responsible for client onboarding and retaining customers on Appactive platform.

### Software Developer

July 2011 – Sep 2012

*Tavisca Solutions – Pune | [www.tavisca.com](http://www.tavisca.com)*

- Joined as a software development trainee and was assigned to the R&D team.
- Worked on entire stack (WCF, C#, .NET, MS SQL server, IIS, HTML, CSS and JavaScript)
- Member of a team that evangelized Agile Software Development, Continuous Integration, DVCS (Git), Unit and Mock Testing, Test Driven Development.
- Instrumental in moving platform to the cloud.
